Debrief Letter to Parent/Guardian

**Your child/ward has participated in a research study titled:
User-Centred Design of Games for Gaelic Digital Normalisation**

Dear Parent/Guardian,

[Participant Code]

I am writing to inform you that your child/ward has participated in a research study ran at Stornoway Primary School on **[INSERT DATE]**.

Approval for this research study has been obtained from the Stornoway Primary School, Comhairle nan Eilean Siar, and the University of St Andrews' Teaching and Research Ethics Committee **[APPROVAL NUMBER TO BE INSERTED]**

What has taken place?

The research project is titled "User-Centred Design of Games for Gaelic Digital Normalisation". The study aims to explore how digital games can be developed and used to support active Gaelic usage within Gaelic Medium Education (GME) contexts.

Your child/ward took part in one research session lasting approximately 45–60 minutes during regular school hours. During this session, your child/ward:

- Interacted with a game prototype designed for Gaelic language engagement for 30–40 minutes. All activities were designed to be engaging and age-appropriate.
- Completed a short post-game evaluation questionnaire.
- Participated in a discussion group lasting 10–15 minutes, where your child/ward discussed their gaming experience and wider thoughts on what would make an appropriate game for them, using child-friendly language. No formal assessment or testing of Gaelic language took place.
- Received a small stationery item and a printed certificate of participation as a token of appreciation.

Why does this matter?

Your child's participation helps researchers create new digital tools to support young Gaelic speakers. Their honest feedback is essential for developing resources that work well for them.

Data Protection

Your child's participation is confidential, and their privacy is protected. All data gathered has been pseudonymised, using the participant code above; neither their name nor participant code will appear in any reports or publications.

Withdrawal

May we remind you that participation in this study was completely voluntary, and deciding to withdraw your data now will not negatively impact your child/ward's education or your relationship with the school. Should you wish to remove your child's data, please do so before [INSERT DATE], and contact the researcher, supervisor or school as soon as possible.

What next?

Findings will be shared with the school once the research has been fully anonymised. We have encouraged the school to share this with pupils and parents.

If you would like any further information about the study or if you have any questions, then please do not hesitate to contact us using the details below.

Many thanks,
Luke Macleod
