Debrief Letter to Parent/Guardian

**Your child/ward has participated in a research study titled:
User-Centred Design of Games for Gaelic Digital Normalisation**

Dear teacher,

[Participant Code]

I am writing to thank you for participating in a research study run at Stornoway Primary School on **[INSERT DATE]**.

Approval for this research study has been obtained from the Stornoway Primary School, Comhairle nan Eilean Siar, and the University of St Andrews' Teaching and Research Ethics Committee **[APPROVAL NUMBER TO BE INSERTED]**

What has taken place?

The research project is titled "User-Centred Design of Games for Gaelic Digital Normalisation". The study aims to explore how digital games can be developed and used to support active Gaelic usage within Gaelic Medium Education (GME) contexts.

I would like to thank you for participating in the mock session as well as participating in the research itself and facilitating the experiment.

During the research session(s):

You observed pupils playing a Gaelic digital game prototype for 30-40 minutes. Pupils then completed a post-game evaluation questionnaire. Pupils participated in a group discussion, sharing feedback on the game and their wider views about games in Gaelic. You provided professional feedback on game appropriateness, cultural fit, and safeguarding measures. You ensured all pupils were safe and comfortable throughout, which I am very grateful for.

Your presence and professional judgment were crucial in maintaining safeguarding standards and ensuring the research was appropriate for your pupils.

Your Role and Feedback

As the classroom teacher, you provided invaluable insight on:

- Game appropriateness and educational alignment, cultural sensitivity GME connection, pupil engagement, learning potential, as well as safeguarding measures.
- This professional feedback directly informs the development of the game and ensures it meets the needs of GME students.

Why does this matter?

Your participation helps researchers create new digital tools to support young Gaelic speakers. Your honest feedback is essential for developing resources that work well for those young speakers.

Data Protection

Your participation is confidential, and your privacy is protected. All data gathered has been pseudonymised, using the participant code above. Your name or participant code will not appear in any reports or publications.

Withdrawal

May we remind you that participation in this study was completely voluntary, and deciding to withdraw your data now will not have any negative consequences. Should you wish to remove your data, please do so before **[INSERT DATE]**, by contacting the researcher or supervisor as soon as possible.

What next?

If you would like any further information about the study or if you have any questions, then please do not hesitate to contact us using the details below. Meanwhile, findings will be shared with the school once the research has been fully anonymised. We encourage you to share this with pupils and parents.

Many thanks,
Luke Macleod
