Letter to Parent/Guardian

Invitation for your child/ward to participate in a research study titled: User-Centred Design of Games for Gaelic Digital Normalisation

Dear Parent/Guardian,

I am a student in the School of Computer Science at the University of St Andrews.

I am writing to you to ask if you would be willing to allow your child/ward to participate in a research study that I would like to run at Stornoway Primary School.

Approval for this research study has been obtained from the Stornoway Primary School, Comhairle nan Eilean Siar, and the University of St Andrews' Teaching and Research Ethics Committee [APPROVAL NUMBER TO BE INSERTED]

About the Study

The research project is titled "User-Centred Design of Games for Gaelic Digital Normalisation". The study aims to explore how digital games can be developed and used to support active Gaelic usage within Gaelic Medium Education (GME) contexts.

- Your child/ward is invited to participate because they are enrolled in a GME programme and meet our selection criteria (aged 8–12 years, upper primary level of Gaelic proficiency, and familiar with technology-based activities).
- If you consent, your child/ward will take part in one research session lasting approximately 45–60 minutes during regular school hours. During this session, your child/ward will:
 - Interact with a game prototype designed for Gaelic language engagement for 30–40 minutes. All activities are designed to be engaging and age-appropriate, and any technical difficulties will be minimised through pre-testing.
- Complete a short post-game evaluation questionnaire.
- Participate in a discussion group lasting 10–15 minutes, where your child/ward will discuss their gaming experience and wider thoughts on what would make an appropriate game for them, using child-friendly language. No formal assessment or testing of Gaelic language ability will occur, and there are no repeat visits or additional activities required.
- Your child/ward will receive a small stationery item and a printed certificate of participation as a token of appreciation.

If you are interested in taking part, further details are available in the Participant Information Sheet that I have attached to this letter.

Participation in this study is completely voluntary, and deciding not to take part or to later withdraw will not negatively impact your child/ward's education or your relationship with the school.

Next Steps

If you are willing for your child/ward to participate in the research study, please complete the attached consent form and return it to a member of the school staff or get in contact with us using the details below. If you are willing for your child/ward to participate in only specific components of the study, please indicate these on the consent form/by letting us know.

If you would like any further information about the study or if you have any questions, then please do not hesitate to contact us using the details below.

Many thanks,
Luke Macleod
